We run tenant outreach across Greater London and the surrounding commuter belt using a network of accounts, each searching a named area within roughly a 5 km radius. Coverage is split into **South London** (boroughs south of the River Thames) and **North London & the commuter belt** (everything north of the Thames, including the Home-Counties towns that ring the capital). The next page maps our current coverage; the area-by-area breakdown follows in the tables.

How we define North vs. South

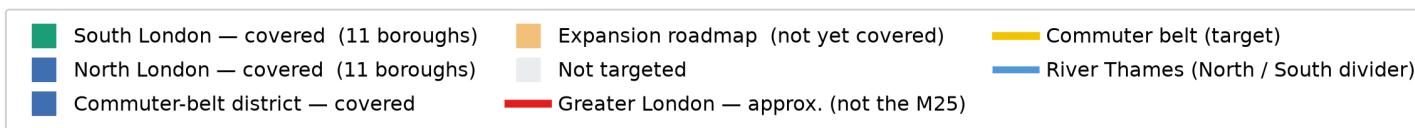

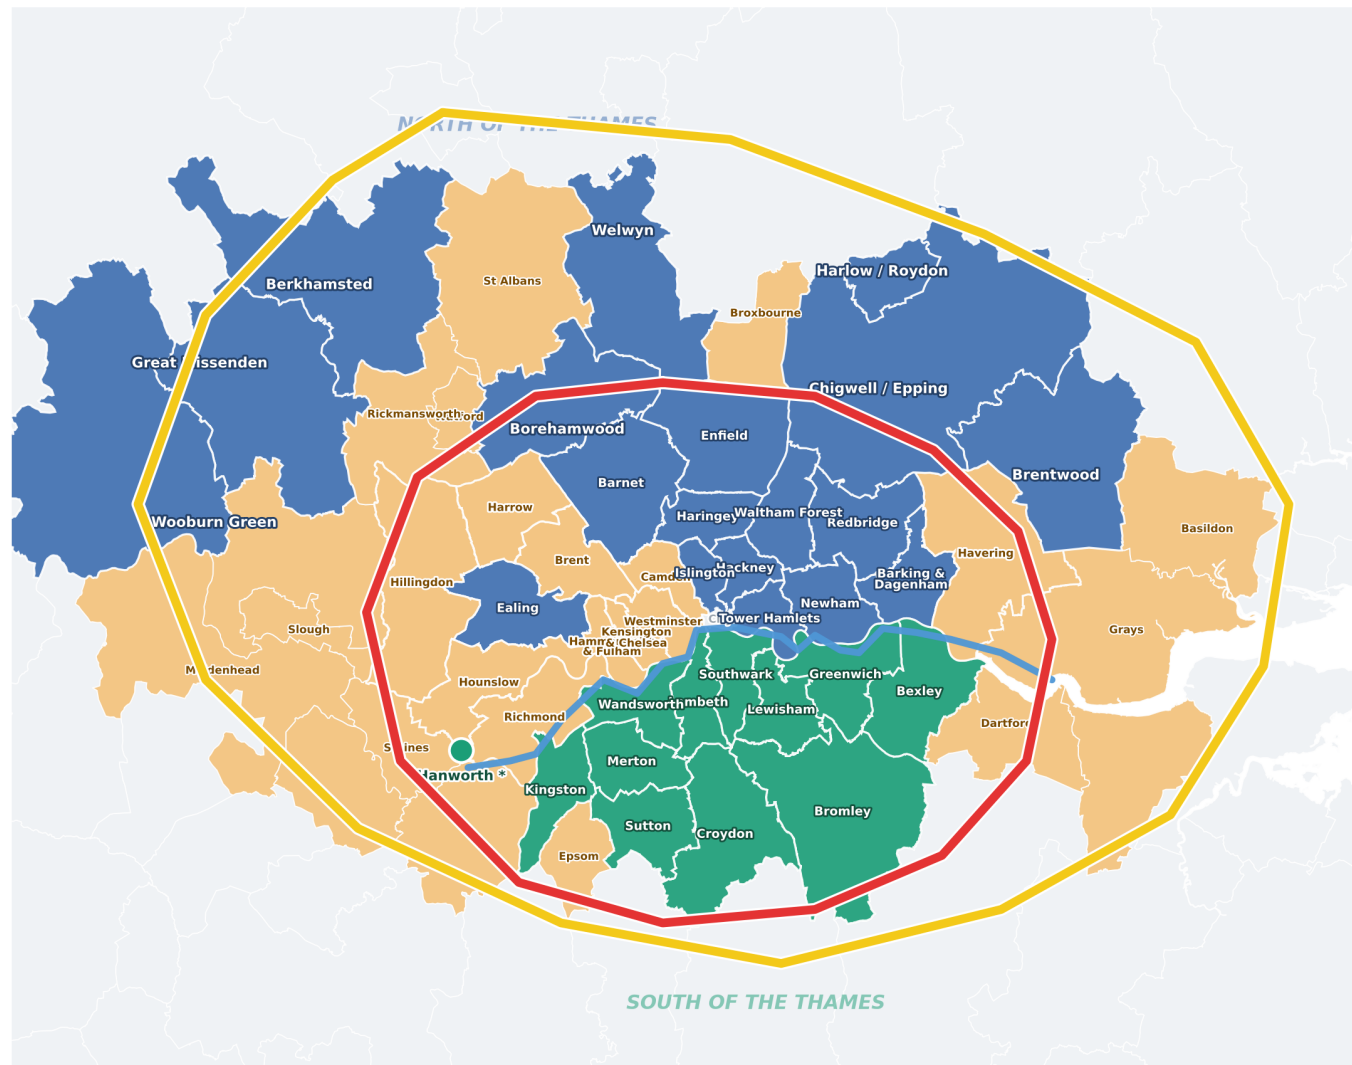

The **River Thames is the North/South divider**: areas south of the river are South London, areas north of it are North London. The single exception is **Hanworth**, which we group with South London for operational reasons even though it sits just north of the river (marked with * on the map and tables). The **red outline is the Greater London administrative boundary — not the M25**; the two run close together but are not identical, so 'inside the M25' and 'Greater London' are not the same thing (several of our covered commuter towns lie between the two).

Recently strengthened

Alongside our established South London network and the commuter belt, we have brought a cluster of **North & East London** boroughs into active coverage — including Hackney, Tottenham, Walthamstow, Wood Green, Enfield, Ealing and Ilford — materially widening reach north of the river.

■ See the full coverage map on the next page, with the area-by-area detail in the tables that follow.

Coverage — North & South London and the Commuter Belt

Green = South London boroughs (covered) · Blue = North London boroughs & commuter-belt districts (covered) · Amber = expansion roadmap (not yet covered) · Grey = not targeted · Red outline = Greater London, approx. (not the M25) · Yellow outline = commuter belt · Blue line = River Thames (North/South divider). * Hanworth is grouped with South London though it lies just north of the Thames.

Currently covering — South London (34 areas)

Area	New listings / month	Phone numbers captured
Woolwich	580	40
Hanworth *	399	116
Lewisham	341	108
Upper Norwood	331	112

Finchley	27	1
East Ham	26	1
Barking	11	1
Ongar	11	8

New listings / month = fresh listings reached in the last 30 days. Phone numbers captured = cumulative landlord mobile numbers acquired to date. * Hanworth is grouped with South London though it sits just north of the Thames.

Scaling to full coverage of the focus zone

To cover **every** area inside the Greater London (red) and commuter-belt (yellow) focus zones, the fleet would need to scale roughly as shown below. Basis: one SIM sustains ~8 landlord contacts per day (≈45 new listings / week). We currently run **14 SIMs**.

Zone	Est. new listings / week	SIMs for full coverage
Greater London (red zone)	~2,200	~50
Commuter belt (yellow zone)	~1,300	~30
Total focus zone	~3,500	~80
Currently deployed	~14 SIMs	14

Full coverage is a phased scale-up from today's **14 SIMs to ~80** — roughly 6× the current fleet. Figures are approximate; the commuter-belt estimate is the softest as several towns are not yet actively searched.

Not yet covered — expansion roadmap

These areas sit inside the focus zones but are not yet covered — the priority runway as the fleet scales toward ~80 SIMs. Grouped by zone:

Zone	Priority areas (not yet covered)
Greater London — North & East	Romford, Dagenham, Chingford, Woodford
Greater London — West & Central	Fulham, Hammersmith, Brent, Harrow, Camden, Putney, Richmond, Uxbridge, Hayes, Kensington, Chelsea, Westminster
Commuter belt — North	Luton, St Albans, Watford, Hemel Hempstead
Commuter belt — East	Hertford, Broxbourne, Chelmsford, Basildon
Commuter belt — West / SW	Slough, Maidenhead, Reading, Guildford, Woking

Every London borough is either covered or on the expansion roadmap. The only exception is the **City of London**, shown as not targeted: it is almost entirely commercial, with negligible residential rental stock.

Prepared September 2026. New-listing volumes are last-30-day counts; phone-number totals are cumulative landlord mobile numbers acquired. Coverage radius is approximate.
